

PEDIATRIC

MiniMe[®]2 Nasal Mask

For the little faces that matter most

The MiniMe[®]2 Nasal Pediatric Mask, developed with guidance from leading children's hospitals, provides a comfortable, non-invasive design that is easy to fit and adjust. It provides a soft, secure, and personalized fit, allowing for unmatched comfort for the extra small faces we care so much about.

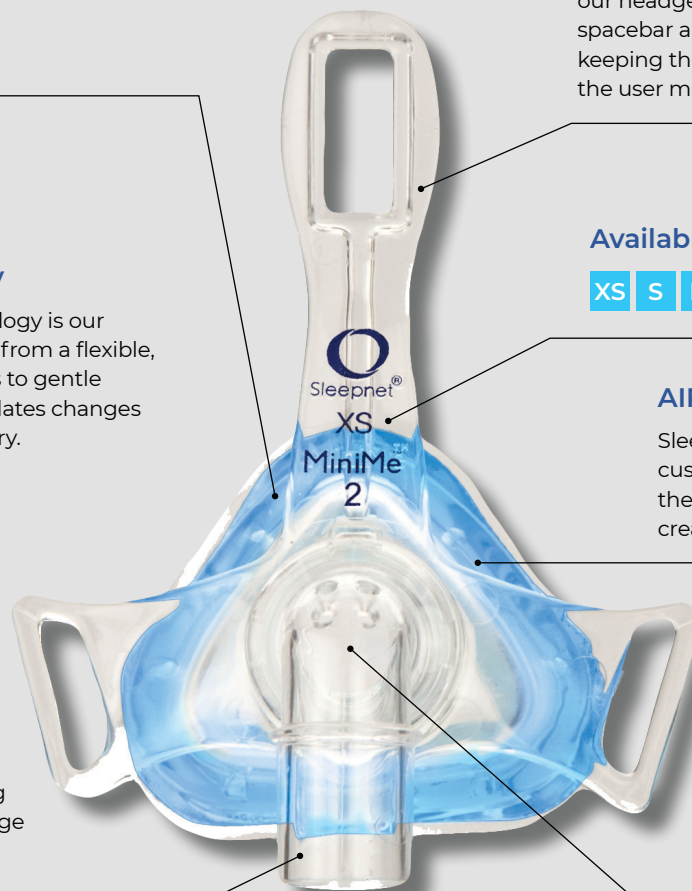

Custom Fit Technology

Sleepnet's Custom Fit Technology is our proprietary technology made from a flexible, pliable material that responds to gentle manipulation and accommodates changes in weight and facial asymmetry.

360° Rotating Elbow

Designed to provide flexibility and comfort, the 360° rotating elbow allows the user to change sleep positions, move their head, or adjust the mask without discomfort.

Touchless Spacebar

Adding comfort with its contactless design, our headgear attaches to the touchless spacebar and provides additional stability by keeping the mask seal in place when the user moves.

Available Sizes:

XS S M L

AIR[°]gel[®]

Sleepnet's AIR[°]gel[®] is an advanced cushion technology that conforms to the contours of each individual face creating a secure and comfortable seal.

Vented and Non-Vented Versions Available

MiniMe[®]2 can be used for both hospital and homecare.

What makes our MiniMe[®]2 different

Softer Comfort - Sleepnet's AIR[°]gel[®] is a leading edge innovation developed and designed to enhance the comfort and effectiveness of our respiratory masks.

Personalized fit - Custom Fit Technology allows the user to easily shape the mask by gently bending and molding it along the sides, top, and bottom to provide a consistent and secure fit.

Easy to fit - The mask is specifically designed to provide an optimal fit and superior seal with less pressure - an essential feature in the pediatrics.

Touchless Spacebar:

Our touchless spacebar is a mask component that sits vertically at the top of the mask interface. The headgear attaches to the spacebar without contacting the skin. It is designed to provide additional stability by holding the mask seal in place when a patient moves. It also provides added comfort with its contactless design.
